Key Projects

Shelter Finder

https://github.com/Kbuchanan032/Project-3 | https://p3-shelter-finder.herokuapp.com/

Tools: React, JavaScript, CSS

Designed and implemented website to facilitate users for searching nearby shelters and service providers by tracking and recording current and past guests. Generated user-friendly interface by transferring routed data from UI to Mongo database.

Semi-Random Recommendations

https://github.com/AeroAtlas/Project2Beta | https://project2beta.herokuapp.com/

Tools: Handlebars, Javascript, CSS

Structured and executed website providing users semi-random recommendations related to TV shows and games based on selected criteria and data collected from two APIs: The Movie Database (TMDB) and Rawg.
