IVANNA CHUMATSCHKO

FULL STACK WEB DEVELOPER

SUMMARY

Recent graduate of the University of Arizona's Full-Stack Developer Bootcamp. Skills in front-end web development and responsive website design, as well as a robust understanding of server-side technologies. Well-organized and able to pick up new concepts quickly, I thrive in fast-paced environments with a variety of opportunities for creative problem solving. Capable of completing projects independently or as part of a team.

EXPERIENCE

[July 2018] – [Present]
Remote Service Specialist • Agency Resource Solutions

- Utilized a streamlined process for handling service tasks in four independent State Farm agencies.
- Communicated with existing clients regarding late payments and documentaion/information requests
- Worked with in-office staff to provide a high-quality customer service experience.

[May 2016] – [July 2018]
Office Manager • Sherwood Insurance Agency

- Worked with prospective clients to conduct comprehensive analyses of their insurance and financial service needs.
- Processed billing and policy change requests from existing clients.
- Developed training materials and worked to ensure compliance to company and industry standards.

[January 2018] – [May 2018]
Political Affairs Intern • The Borgen Project

- Used email outreach and social media to create awareness and encourage engagement of congressional representatives in support of foreign development aid.
- Aided in creating broad awareness and understanding of social issues impacting the community.

PROJECTS

Semi-Random Recommendations
Github | Heroku
A site to help users find new content to watch or play by randomly suggesting a movie, TV show, or game based on the user's preferences. Registering for an account allows users to save their recommendations and return to them later.
– ***Core Responsibilities:*** Updated front-end code using Handlebars to load content dynamically depending on a user's location within the site and whether or not the user is registered or logged in.
– ***Technologies Used:*** Handlebars, Javascript, jQuery
